

Dear customer:

ETAL, S.A. de C.V. is a member company of Grupo Marmex with over **50 years' experience** offering resistance welding consumables, brazing alloys, electrical contacts, machining in ferrous and non-ferrous materials as well as the commercialization of welding equipment. We offer industrial solutions to the automotive, electrical, industrial, refrigeration, and transport sectors. We provide our clients with quality, compromise, and a guarantee that all our products comply with the necessary industry standards.

One of the few vertically integrated companies in Mexico whose operations cover non-ferrous casting, hot forging, extrusion, CNC and conventional machining, powder metallurgy, platings and finishes as well as assembly lines for different products.

We are well aware that a key factor in the supply chain is that each client is assured of the resources that guarantee the company's optimum operation and are thus able to respond quickly to any specific customer requirements. This is why we operate our own manufacturing plant, supported by a network of 10 sales offices located strategically throughout the country, thus ensuring both the sale and supply of materials in a timely manner to any company that provides train maintenance services.

Etal's main objective is to assure customer satisfaction, which we achieve based on well-defined values, including compromise, responsibility, excellence, teamwork, communication, and integrity, as well as the highly personalized attention provided by our sales team, who are supported by our technical service staff, offering extensive experience in this sector. We guarantee the quality required by our clients, on-time product delivery, and aim to create long-term relationships with all our customers, both large and small.

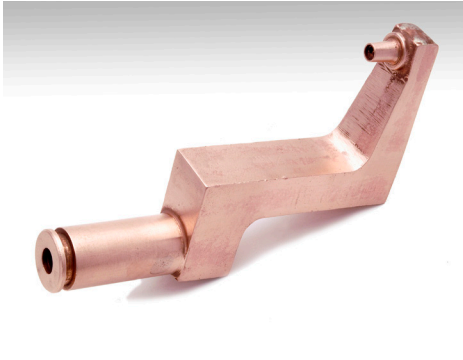

Amongst our product list, you will find the following:

- Caps
- Electrodes
- Special electrodes
- Holders & arms
- Water cooled cables
- Air cooled cables
- Welding wheels
- Shunts
- Special machining
- Standard and specialized welding machines
- Resistance welding courses
